

Project Independence Program

The Project Independence (PI) program assists seniors in maintaining their independence, and reducing risk for re-hospitalization, during a health crisis.

PI is a volunteer based program that provides short-term, non-medical assistance to Collin County seniors aged 60 or above who have had a recent hospitalization or health decline. Volunteers may provide assistance with transportation to the doctor, errands, and light housekeeping. Clients are enrolled in this program for up to eight weeks depending on their need. There is no charge to clients for participating in Project Independence.

Volunteer to help our seniors maintain mobility and independence after a hospitalization.

If you are interested in serving seniors, Project Independence may be the program for you!

Currently, we are seeking volunteers, 18 years or older, who have the ability to provide assistance with:

- Transportation
- Errands
- Light housekeeping

Your assistance and presence can make the difference in a senior's ability to keep their doctor's appointments and pickup groceries. Your visit and smile can provide comfort and hope during a time of struggle. Please call, email, or visit our website to learn more!
